

Edition 3

# Glazing Tools

**Carlyle Bus & Coach Ltd.** is the leading parts and service solution provider for the bus and coach industry, delivering parts to operators throughout the UK, Ireland, Europe and worldwide and will continuously improve its products and services to ensure that the customer's expectations are met.

Carlyle has a long association with the bus and coach industry, originally being the key parts and engineering support for many of the national bus operating companies down to single owner operated businesses.

Today Carlyle continues to be a leading provider of body components and engineering services to the bus and coach industry, now offering its extensive knowledge and range of parts to operators, builders and converters throughout the world. We do this through education, development and empowerment of our workforce so they will have the necessary skills to deliver a high quality service to our customers. We ensure we acknowledge and adapt to our external environment and make certain we identify our customer's needs and satisfy them before our competitors do.

In today's fast moving world, we understand the importance of being flexible and responsive to our customers, therefore Carlyle's motivated workforce with expert knowledge will work in a clean, safe and rewarding environment and take their utmost pride in supplying quality products and services each and every time.

Carlyle operates 45 vans and 3 lorries supplying parts and glass from its 6 depots to operators throughout the UK and Ireland. Carlyle's dedicated distribution hub, alongside the central motorway network, supplies strategically located branches throughout the UK. Branches are currently sited in Birmingham, Bristol, London, Glasgow, Manchester and Dublin. Each branch is re-stocked overnight by the company's own fleet of lorries. In addition our customised delivery vans deliver direct to customers throughout the UK and Ireland, supported by VOR carrier services, to help minimise coach and bus downtime.

One of the best known names in the specialist supply of parts to the bus and coach industry, Carlyle Bus & Coach Limited has a pedigree that goes back far beyond the formation of the company in its current guise in 1990 to the time when Carlyle Works was the engineering headquarters of the Birmingham and Midland Motor Omnibus Company (better known as the Midland Red,) the second biggest operator in the country and builder of its own buses. The company still has models of some of those innovative in-house bus designs but while full sized BMMO buses have largely faded into history, Carlyle Bus & Coach has remained at the forefront of the efficient and cost-effective supply of parts to customers.
