

# ABOUT

The Chapman Driver Seat has been setting standards for comfort and durability for decades. Look around any bus depot in the UK, Europe or even the Far East and you will soon notice that the majority of driver seats are Chapman. Why? It's simple - Chapman seats have provided bus and coach operators with a comfortable, robust and serviceable driver seat that just keeps on going. All our seating products are designed with comfort, function and serviceability in mind.

Chapman are the preferred supplier to the top 5 UK operators as well as many large and small independent operators and offer an unrivalled service in the bus industry. We work with the operators to fine tune the specification and supply directly to the bus builders whilst dealing with the aftermarket through a number of carefully chosen distributors.

Chapman Driver Seating was acquired by A.E. Harris & Co (Birmingham) Ltd in August 2010 and with over 130 years' experience in a variety of disciplines from laser cutting to tube bending, A.E. Harris now make all metal components found within the Chapman range of products.

Most driver seats are supplied through distributors only - Chapman manufacture and support their products from their central Birmingham factory.

Both A E Harris and Chapman Driver Seating are ISO9001:2008 accredited.

# TESTING

Most Chapman products have been thoroughly tested to meet the standards required from this demanding industry. Seat assemblies with seat-belts have been pull tested at MIRA to M3 76/115/EEC standard and extensive load and durability testing has been undertaken at Millbrook Proving Ground's testing facilities on our latest height adjusters.

For further information about product testing, please see the relevant product page or our web site.

For further information or technical support please call 0845 838 2305 or visit our website.
